

Smart Contract Lottery

How it Works

- The lottery demo is a demo of a smart contract implementation which uses a programmed smart contract to record your lottery number and ticket purchase
- You must have an account on our Demo Framework and own Kypto Tokens (KRYP) to play to game
- It then polls all bets at 12.00AM GMT +8 every day and determines a winner (if exists based on numbers selected by players)
- If no winners exists, the pot will remain to be won the next day
- If a winner exists, the pot will be automatically transferred to their KRYP wallet (minus 10% transaction fees) and the game resets itself
- If more than one winner exists, the pot will be automatically divided equally and transferred to each winner's KRYP wallet

Register for Our DEMO Framework Account

Step 1: Register for an account:

1. Go to www.kryptosys.com
2. Click on Demo Framework -> Sign Up
3. Key in your details -> Click on Sign In
4. Check your registered email for your login information

Register for Our DEMO Framework Account

Step 2: Login and get some KRYP

1. Login to the system (you may have to key a new password if its your first time logging in)
2. Click on “Krypto Wallet Demo”
3. Click on “Create New Wallet”
4. Once you have a new wallet address -> click on “Request 1 KRYP”

Play the Lottery

Step 3: Playing the Lottery

1. On a new window, go to **lottery.kryptosys.com**
2. Click on Jackpot 4/45
3. Click on Play Now and select your lottery number
4. Purchase the lottery ticket by transferring **1 KRYP ONLY** from your Krypto Wallet to the newly generated smart contract account:
 - a) Go back to your demo account
 - b) Click on the 'SEND KRYP' button
 - c) Copy and paste the Lottery's Contract Address into the 'SEND TO' field, enter amount of **1 KRYP ONLY (this is your ticket price)** and click on the SEND button

Next draw is at 12AM tonight!
Good Luck!

Thank You
